

Lubricity Additive N 508

Lubricity enhancer for neat metalworking fluid

Description

Castrol Lubricity Additive N 508 is a phosphorous containing anti wear additive. It can be used in single sump machines as well as central systems.

Application

Castrol Lubricity Additive N 508 improves the lubricity of oil based metalworking fluids.

Conditions of Use

Castrol Lubricity Additive N 508 should only be used upon recommendation of Castrol's Service Representative that will help with the recommended concentration.

Typical Characteristics

Appearance = Clear liquid

Flash point: 159°C

Viscosity, dynamic at 20°C = 12.4 mPas

Storage

To avoid product deterioration, keep the container/drum tightly sealed always. Prevent any frost and water ingress. Store it in a cool and dry place away from direct sunlight. It is preferable to store the product indoors always. For more details, please refer to the product safety data sheet.
